Workshop on

Map creation from user generated data

October 8th, 2012, Hannover

organized by:

DGfK

Commission on Cartography and Research of the German Cartographic Society

together with:

i kg

Institute for Cartography and Geoinformatics of the Leibniz University Hannover

More information:
http://www.visualisierung.dgfk.net

12:30   *Session 1 | Chair: Monika Sester*

        Opening

        Map creation and cartographic communication in Web 2.0
Karsten Hoffmann (University of Osnabrück, Germany)

        Creating a worldwide 3D globe from user-generated data
Matthias Uden , Arne Schilling, Ming Li, Marcus Götz, Alexander Zipf (University of Heidelberg)

        Individual Theme Route Planning on User-generated Content
Karsten Pippig, Dirk Burghardt, Nikolas Prechtel (TU Dresden, Germany)

13:45   *Coffee break*

14:15   *Session 2 | Chair: Georg Gartner*

        The Impact of the Contributor in VGI projects
Silvia Klettner, Manuela Schmidt, Elisabeth Häusle, Renate Steinmann (TU Vienna / Salzburg Research Forschungsgesellschaft, Austria)

        Mapping the spatial patterns of fields traffic and traffic intensity by means of GPS-data received from farm vehicles
Rainer Duttmann, Michael Nolde (University of Kiel, Germany)

        Generating Sentiment Maps of Touristic Locations based on Visitors' Reviews and OSM
Sarah Tauscher, Karl Neumann (TU Braunschweig, Germany)

15:30   *Coffee break*

16:00   *Session 3 | Chair: Jochen Schiewe*

        Spatial delineation of geographic objects using an online knowledge repository
Tobias Dahinden (Leibniz University Hannover, Germany)

        Applying User Generated Geographic Information from Social Networks for the Creation of Maps - Towards a Research Agenda
Oliver Roick (University of Heidelberg, Germany)

16:45   **Open discussion**
on the ICA Research Agenda and a joint project of the Commission „Cartography and Research"

17:45   **Closing**
